**Limited Warranty Statements**

1. **Warranty**
   The manufacturer warrants the Product to be free from defects in material and workmanship for a period of 12 months from the original date of purchase. If you discover a defect in the Product covered by this warranty, we will repair or replace the item at our option using new or refurbished components.

2. **Exclusions**
   This warranty covers defects in manufacturing discovered while using the Products as recommended by The manufacturer rather than occurred by the act of God, and damages caused by misuse, abuse, and unauthorized modification.

3. **Limited of Liability**
   The manufacturer will not be held liable for incidental or consequential losses or damages to any act of God.

4. **Reminder**
   Service requirement shall subject to the presentation of this warranty card and defective parts to the manufacturer. The warranty card will not be reissued if lost.

LATCH BACKSET ADJUSTMENT

Remarks:
Please notice the slight differences in the latch box between two different backsets.

- 2 3/8” (60 mm)
- 2 3/4” (70 mm)
1. Backset Determination
Backset is a distance from door edge to centre of hole on door face. Adjustable latch fits both backset of 2 3/8" (60 mm) and 2 3/4" (70 mm).

2. Change Latch Face
Determine which latch mounting method will be used and make necessary adjustments. No adjustment required for square latch face plate.

   a. Use a flat screwdriver to separate the face plate.
   b. Snap selected latch face plate onto back plate.

Drive-in Installation
Remove original latch faceplate. Align the drive-in sleeve (I) as illustrated and snap into the latch case.
3. Latch Backset Adjustment
Determine if the latch (D) needs to be adjusted to the 2 3/4” (70 mm) backset.
To adjust, rotate the latch until it stops.
Reverse the direction to return to the 2 3/8” (60 mm) backset.

4. Mark the Door with Template
Select the height and backset as desired on the door face; use the TEMPLATE as an indication to mark the centre of the circle on the door face and the centre of the door edge.

5. Drill Holes
Using the marks as a guide to drill a hole Ø2 1/8” (54 mm) through the door face for the lockset, then a hole of Ø1” (25.4 mm) for latch.
6. Mark the Outline of Latch Faceplate
   Insert the latch (D) and ensure it is parallel to the door face.
   Mark the outline of the faceplate, then take out the latch (D).
   You need to stay this way up when inserting the latch.
   Make sure the cross in the latch is on the bottom.

7. Chisel Space for Latch Faceplate
   Chisel 5/32" (4 mm) deep along the outline to allow the faceplate to be aligned with the door edge.
   Note: It is not necessary to chisel the door edge for the faceplate installation if you use the drive-in latch.

8. Install Latch
   Insert the latch (D) into the door. (Make sure the cross is on the bottom of the latch.) Use 2 wood screws (K) to secure latch.
   Please do not fully tighten the screws until lock is completely installed.

</table>
**ASSEMBLY INSTRUCTIONS**

**Install Drive-in Latch**
Drive the latch (D) into the hole on edge of door.

**9. Mark the Outline of Strike**
To identify the centre of strike: close the door to lay the latchbolt against the door frame. Mark the centre line on the doorframe exactly opposite the latch hole in the door edge.

**10.1 Drill Hole on Door Frame**
Measure one half of door thickness from door stop and vertically mark centre line of strike. Drill 1" (25.4 mm) hole, 1" (25.4 mm) deep at intersection of horizontal and vertical line of strike.

**10.2 Chisel Space for Strike**
Chisel 5/64" (2 mm) deep along the strike outline to allow the strike to be aligned with the doorframe.
ASSEMBLY INSTRUCTIONS

11. Install Strike on Door Frame
Install the strike plate (E) into your door frame and tighten with wood screws (K).

Hardware Used

- K Wood screws x2

12. Install Touchpad Assembly
Make sure the latch bolt is retracted.

13. Install Touchpad Assembly
Install cylinder (B) into the deadbolt touchpad assembly (C) with tailpiece in horizontal position inserted through hub of the latch.
**ASSEMBLY INSTRUCTIONS**

14. **Install Touchpad Assembly**
Pass the IC wire under the latch (D) to the interior side of the door, and insert the tailpiece through the cross-shaped crank of the latch.

15. **Install Inside Mounting Plate**
Pass the IC wire through the wire hole of the mounting plate (F). Fix the mounting plate (F) with screws (L). If outside lock assembly is lopsided, please loosen the screws to adjust its position and tighten the screws again.

**Hardware Used**

![Image of hardware used]

**16. Identify Door Handing**
Face the door from the outside. The door is left-handed if the hinges are on the left side of the door, whereas the door is right-handed if the hinges are on the right side of the door.
17. Adjust Thumb Turn Piece
Rotate the thumb turn piece to the LEFT at 45 degrees for right-handed doors.
Rotate the thumb turn piece to the RIGHT at 45 degrees for left-handed doors.

18. Install Receiver Module
Remove the battery cover (H) (push it up first then pull it out).

19. Install Receiver Module
Connect the IC wire into the back of the receiver module. Ensure that the deadbolt tailpiece is engaged with turn piece, then attach receiver module (G) to the door with screw (J). Use the optional wood screw (K) to secure the receiver module to wood doors only.

Hardware Used

- **K** Wood screw x1
  This screw is optional. It may not be necessary to use this screw.
- **J** Machine screws x3
20. Insert Batteries
Insert 4 (AA) 1.5 V alkaline batteries and slide the battery cover (H) back onto the receiver module (G).
Remarks:
(1) Alkaline batteries are recommended in order to stabilize the power supply. If you don't use alkaline, battery performance will be reduced greatly.
(2) All settings will be retained in the memory even if the batteries are completely dead.
1 Programming Button
Programming button is for setting function.

2 Lock Button
Lock Button is for lock and unlock function.

3 Cylinder
To lock/unlock the lockset by key from outside.

4 Washer
Prevents water from permeating into lockset.

5 Battery Lid
Slide the lid to change the batteries.

6 Battery Holder
Four AA (1.5 V) alkaline batteries.

7 R Button (Reset)
Restore default settings.

8 Turn-piece
To lock/unlock the lockset from inside.
Keep the door open while programming to avoid being locked out accidentally. The lock contains one factory-preset user code but can be programmed to store up to a total of six additional unique user codes. Codes can be added and deleted at any time. For first-time programming, use factory default programming code. It’s recommended to change the default programming code and default user code right after you install the lock. Every programming step should be done within 6 seconds.

OPERATING INSTRUCTIONS

Default programming code (PC): 0000
Default user code (UC): 1234

Your new programming code (PC) ____________
Your new user code (UC) ____________

The same programming code and user code cannot be accepted.

The lock will cease operation if unauthorized codes are entered over 5 times. The system will unfreeze after 45 seconds.

1. Door Handling Identification Process
   The lock needs to learn if your door is a right- or left-handed.

   DO THIS FIRST

2. Change Programming Code
   Enter PC → 4 → Enter New PC

3. Add New User Code
   Enter PC → 1 → Enter New UC

   Note: Up to 30 sets of user codes can be saved. User codes should be 4–10 digits in length.

4. Delete an Existing User Code
   Enter PC → 2 → Enter the UC you want to delete

5. Delete All User Codes at Once
   Enter PC → 3

   Note: Auto-locking and keypad locking functions will be invalid when user codes are deleted.
The lock can only be operated by key during that time.

Your new programming code (PC) ____________
Your new user code (UC) ____________
OPERATING INSTRUCTIONS

6. Toggle Auto-Lock On/Off

- Enter PC → 5
- Note: The preset delay-time is 30 seconds, you can change the time by following instructions #7. Repeat the steps in #6 to cancel the auto-locking function.

7. Set Auto-Lock Time Delay

- Enter PC → 6
- Enter Seconds (10–99)
- Note: 10–99 seconds delay-time available.

8. Enable/Disable All User Codes

- Enter PC → 7
- Note: Auto-locking and keypad locking functions will be invalid when user codes are disabled. The lock can only be operated by key during the time. Repeat the steps to enable the user codes again.

9. Create a One-Time User Code 4–10 Digits Long

- Enter PC → 8
- Note: The one-time user code will automatically cancel after it is used one time.
10. Restore Default Settings

Press R

Note: Press the button for more than 5 seconds; the programming is reset back to the original factory codes once you hear 3 long beeps. After restoring default settings, you must run the door handing identifying process (#1) again before programming any other functions.

CARE AND MAINTENANCE

Do not use any chemical liquid or lubricating oil with additives to clean the lock body. It will damage the surface or even mainboard.

WARRANTY

The manufacturer warrants the product to be free from defects in material and workmanship for a period of 12 months from the original date of purchase. If you discover a defect in the product covered by this warranty, we will repair or replace the item at our option using new or refurbished components.

EXCLUSIONS

This warranty covers defects in manufacturing discovered while using the products as recommended by the manufacturer rather than occurred by the act of God, and damages caused by misuse, abuse, and unauthorized modification.

LIMITED LIABILITY

The manufacturer will not be held liable for incidental or consequential losses or damages from any act of God.
